We had a great morning with [One Planet Middlesbrough: Creating Sustainable Communities](#) in the fantastic Centuria building [Teesside University](#). Lots of discussion on local food and getting it into Middlesbrough. Met some exciting and very passionate people there today. Here's to the future. #LFFLB2015

Woof!

Michael Charlton - Holcroft Foods

This event was a fantastic opportunity to promote our business and the fact that we already buy and supply locally sourced fruit and vegetables. It was a wonderful opportunity to network and make contacts to grow the business, and as a result we have two very positive leads to follow up on and also links to another great local product that we may start to stock and supply.

We made a great link with a local business that can help us with funding regarding our marketing, including the branding of our van.

We also found out about potential additional support and training relating to procurement and writing tendering bids, which we weren't expecting, but are very happy about.
